SUMMARY

Computer engineer with 4+ years of experience in full-stack development, backend systems, and mobile apps. I've led the migration to microservices of a nationwide pharmacy chain's ecommerce platform, built a marketing agency's entire tech infrastructure from scratch, and independently built and shipped SaaS and ecommerce products to production. I work with TypeScript, React, Next.js, NestJS, .NET, and Flutter.

EXPERIENCE

Full-Stack Developer

March 2023 — Present

Organización Comercial Belloso (Cobeca) · Zulia State, Venezuela

- Systems used by roughly 80% of pharmacies nationwide: ecommerce, admin panel, returns portal, and discounts portal.
- Leading the migration of the ecommerce platform to microservices (identity, catalog, orders, payments, and rate) — 5 services so far.
- UX and performance improvements across the systems above, and modernization of legacy architectures into more maintainable, scalable systems.

Tech Lead

March 2025 — July 2025

Amor Marketing LA · Remote, United States

- Designed and built the company's entire tech ecosystem from scratch (Vercel, Render, Neon, GitHub, Google Workspace) at a company with no prior IT department.
- Led a team of 5 people, setting up CI/CD and agile workflows (Scrum) that enabled multiple daily deploys of landing pages and client projects.

Full-Stack Developer

February 2022 — March 2023

Supreme Court of Justice · Venezuela

- Built a comprehensive system for the national courts with HR, finance, and biometric attendance (fingerprint scanner) modules, modernizing a legacy system that no longer met operational needs.
- Database design in PostgreSQL and SQL Server, APIs with Node.js, and Linux/Windows server administration, coordinating with multidisciplinary teams.

FEATURED PROJECTS

Vitrona

vitrona.app

SaaS platform that lets businesses launch an online store, take orders over WhatsApp, and serve customers through an AI chatbot. I built the multi-business dashboard, the customizable site builder, and the subscription and billing system.

Next.js · TypeScript · PostgreSQL · Drizzle ORM · Google Gemini

Eleve

eleve.clisoftwarehouse.com

Booking platform for barbershops and salons with two Flutter mobile apps: clients schedule appointments and preview their next haircut generated by AI before sitting in the chair. I built both mobile apps.

Flutter · Dart · Firebase · Google Gemini · NestJS

Keiss

keiss.vercel.app

Online jewelry store shipping nationwide across Venezuela: dual USD/Bs pricing, local payment methods (Pago Móvil, Zelle, Binance), and an admin panel. Personal project I built independently, end to end.

Next.js · TypeScript · PostgreSQL · Better Auth · Tailwind CSS

SKILLS

Frontend	React, Next.js, Angular, Astro, TypeScript, Tailwind CSS
Backend	NestJS, .NET, Node.js, Express, REST API, GraphQL
Mobile	Flutter, React Native, Dart
Databases	PostgreSQL, SQL Server, MongoDB, Redis
DevOps	Docker, Git, GitHub Actions, Azure DevOps, Linux
Methodologies	Scrum, Agile, Clean Architecture, Microservices

LANGUAGES

Spanish — Native · English — Intermediate

EDUCATION

B.Sc. in Computer Engineering
Universidad Rafael Belloso Chacín (URBE)
August 2019 — August 2024 · Zulia State, Venezuela
